There is no reason to silence the traffic and weather channels that satellite radio provides. As a subscriber, I pay for this service, just like I pay for the weather Channel with my cable television and internet services at home. I don't even see any competition from the National Association of Broadcasters. They don't provide local traffic or weather in an easy to access forum. Even if they did, I haven't bothered with terrestrial radio in my car since even before I became a subscriber to satellite services.

Thank you for your time,
Kenji Arai
